

Sven Restel B.InfoSys; G.Dip AppFin

Equities Analyst

Sven's expertise in financial markets is evident by the fact that he set up a private investment fund trading options and CFDs at the age of 23 whilst studying for a Bachelor of Information Systems at La Trobe University in Melbourne. His innovative trading techniques and strategies helped him generate exceptional returns of more than 300% in less than 12 months, despite a prevailing bear market.

After graduating with an honours degree in IT and a Graduate Diploma of Applied Finance from Queensland University of Technology (QUT), Sven gained extensive operational experience in the credit management and IT sectors before taking a lecturing role at QUT. This wealth of operational knowledge has positioned Sven as an industry expert in credit management and technology which is reflected in his winning investment strategies.

Sven's objective and contrarian views, coupled with his considerable success in the market caught the eye of wise-owl.com and he joined the wise-owl.com research team as an Equities Analyst in 2006. Sven's aptitude for fundamental analysis on both a micro and macro level ensures no stone is ever left unturned, and consequently his stock picks have a strong record of outperformance.
